

"INTERACTIVE LECTURES BASED ON REAL CASE SCENARIOS"

COURSE OBJECTIVES

By the end of the course, you will be able to:

- Spot ACS ECG changes with more confidence; covering new different guidelines, new signs related to ECG interpretation, commonly missed signs of MI, how to anticipate ST elevation before it happens, ischemia detection in presence of BBB, and in the paced rhythm, plus discussing changes in concepts that have happened in the last few years.
- Manage some difficult arrhythmia in special circumstances, e.g. with WPW.
- Have a clear D.D when it comes to 'Syncope & ECG'.
- Understand and spot the non-cardiac cause of ECG abnormalities.
- Manage ECGs that look similar but with completely different diagnoses and management plans in the ED setting.

Dr. Hesham A. K. Ibrahim,
Emergency Medicine Consultant, UK

TARGET CANDIDATES

- Aimed for senior EM physicians, HSTs and ACPs, but FY2 and ACCS trainees will get great benefit from it.
- The course starts from a level that is above the ALS ECG interpretation level so it is preferable if the candidates have done the ALS course recently
- The course is of particular importance Emergency Medicine, ITU, Anesthesia, Acute Medicine and Cardiology trainees.
- The course is also of particular importance for the overseas doctors who have just started working in the UK as it covers the interaction between the above specialties when it comes to managing a complicated patient in ED based upon the UK system.
